PROFESSIONAL SUMMARY

Full-stack Engineer and Hardware/Software Developer with experience in developing web applications, backend systems, embedded solutions, and IoT-based projects. Skilled in React, Laravel, PHP, Python, databases, Arduino, and ESP32 systems. Passionate about creating innovative technology solutions through software and hardware integration.

📁 EXPERIENCE

AC: Apex of Champion

Hardware and Software Developer

02/2025 – Present | Isulan, Sultan Kudarat

- Developed software solutions, embedded systems, and digital platforms based on project requirements.
- Built full-stack applications with frontend, backend, API, and database integration.
- Designed hardware prototypes using Arduino, ESP32, and sensor-based systems.
- Tested, debugged, and optimized systems for functionality and reliability.

🎓 EDUCATION

Bachelor of Science in Information Technology

Sultan Kudarat State University

2027

Dean's Lister - Recognized for academic excellence.

Coursework includes software development, programming, database management, system design, and emerging technologies.

🧠 TECHNICAL SKILLS

Frontend

React, TypeScript, JavaScript, Vite, Tailwind CSS, Three.js, React Three Fiber

Backend

Laravel, CodeIgniter, PHP, REST API, MySQL

Hardware & IoT

Arduino, ESP32, Embedded C/C++, Sensors, Electronics Prototyping

Tools

Git/GitHub, VS Code, Linux/Kali, Figma, Docker

📁 PROJECTS

Genspe - Educational Game Learning Platform

Interactive learning game designed to help users learn different terms and categories involving animals, foods, and other subjects through game-based activities.

ClassGuard - Smart Disaster Detection Device

Hardware safety device integrating sensors to detect smoke, flame, vibration, and humidity changes for real-time environmental monitoring.

Job Tracker - Employment Management Application

Mobile application designed to help users discover, organize, and monitor job opportunities and application progress.

AI Image Classification Research

Machine learning research project focused on classifying AI-generated and real text-containing images using visual text-region features.

3D Developer Portfolio

Interactive portfolio website built using React, TypeScript, Three.js, React Three Fiber, GSAP, and WebGL.

CAREER GOAL

To become a skilled Hardware and Software Developer by creating innovative software, IoT, and embedded solutions while continuously improving technical skills and contributing to technology-driven projects.

HOBBIES & INTERESTS

- Exploring technology, programming, electronics, IoT projects, computer activities, gaming, outdoor activities, and continuous learning through hands-on experimentation.
